

# Translation Use Case

## Propose

Author: Mark Hedley

Owner: AVD Team

Version: 1

August 14, 2012

- Primary actor: an editor
- Goal: a proposal for a translation mapping to be moved from ‘draft’ to ‘approved’

### **Main Success Scenario**

To achieve the goal the actor will:

1. Initiate an ‘Edit’ including one or more changes of state from ‘draft’ to ‘proposed’
2. For each of these changes of state, or a coherent collection of such changes, a ticket is raised in the ticketing system.
3. The ticket will reference the pull request and the explicit change (or changes) proposed for approval.
4. A relevant approver will be assigned the ticket by the editor.
5. Initiate a ‘Pull Request’ for the changes.
