Translation Use Case
Release

Author: Mark Hedley
Owner: AVD Team
Version: 1

August 14, 2012

- Primary actor: an Admin

- Goal: a release of the translation mappings

Main Success Scenario

To achieve the goal the actor will:

1. Set the release standard; a release may be:

    - approved only
    - draft, proposed and approved

2. initiate a new 'Edit'

    - no mapping shards may be edited for a release edit;

3. create a release shard, with:

    - a valid and unique release number;
    - a release standard;

4. run a query to return all the mappings which will be included in the release:

5. link all of the results to the release shard

6. initiate a 'Pull Request'.
