Version: 1

August 14, 2012

- Primary actor: an investigator

- Goal: information about the metadata translation information

Main Success Scenario

To achieve the goal the actor will:

1. Obtain a local copy of the translation information.

2. Run a query service on a local machine.

3. Construct a query syntax using SPARQL 1.1.

4. Run the specified query using the local query service.
